

# PARAGON

Engineered Quartz - ●●●●●●○

Paragon Quartz is a gorgeous new addition to the Aurea Stone Collection. Beautifully executed, Paragon brings a pure white base together with soft veining of the most classic of cool-toned Carrara marbles. No other Quartz material comes close to its realistic beauty. Aurea Stone is the first to discover and manufacture their material using PHI Technology. PHI Technology is a one-step, ambient temperature, ambient pressure process that joins the standard manufacturing process and mixing composition in the Engineered stone industry, obtaining an exclusive natural stone looking product that has been pursued for years. This process allows for a stronger, more stain-resistant, more scratch-resistant and all around better performing Quartz.
